

# Urban Hunt

## SYMBION

### GAME GUIDE

## What is this hunt about?

**A historical Escape Game set in the former warehouse on Fruebjergvej, where Symbion grew into Denmark's first startup environment. Here, creativity, community and knowledge laid the foundation for decades of entrepreneurship.**

As you explore, you'll solve puzzles, uncover hidden stories and step into the vision that shaped Symbion – a non-profit idea that dared to go against the current and created room for new ideas to grow.

Everything you need is your minds, your surroundings, one smartphone and something to write with and on.

## Choose a Game Master

One person is the Game Master; their phone opens the game. The Game Master reads the text aloud.

## Pick a Team Name

Got a great team name? Pick one before you start.

## Complete a mission

After each answer entered, the Game Master clicks "Check answer". **A correct answer gets you on to the next location.**

## Make it a physical experience

Make sure you have the three floor plans, a white chip to open doors, a compass (physical or app), and pen and paper.

## Get help during the game

Each puzzle has 3 hints. After that, the Hint button changes to "Get the answer."

**Remember:** Even when you choose to get the answer, you must type in the answer yourself and click "Check answer".

## Point system

You collect points as you progress through the game.

**Up to 1000 points** per puzzle solved on your own.

**-100 points** for each incorrect answer

**-200 points** for each hint you use

**0 points** if you choose to reveal the full answer

## Game Master starts the game

**Only the Game Master opens the game** via this link. The team will *scan a code inside the game* to follow along. When the Game Master clicks Next, the others can refresh to see the update.
